

# Information on the booked technical rental inventory

## Theatre Hall

### **Projector 20'000 Lumen**

SXGA + Resolution

Model Panasonic PT DS20K

1 pc. in total available, permanently installed in the control room for theatre hall

The following connections on your computer are compatible with this projector:

DVI-D

VGA

HDMI

### **Videos**

Will videos with sound be played in your presentation? If so, notify us in good time. This way we can set up and guarantee the correct connection of your laptop to the sound system.

### **PC/Mac**

As a rule, you as the customer bring your laptop yourself. This way we can guarantee that the formatting in the PowerPoint presentations (e.g. fonts) will be displayed as prepared by you. In order to guarantee the best possible quality of the presentation, we recommend that you create the presentation in the resolution of our beamer or according to the selected screen (see above). The quality also depends on the graphic performance of your laptop.

Appropriate adapters for Apple devices are available at our premises. An emergency laptop (PC) is available for rent for CHF 50.00, just in case.
